Hi, I have Samsung Galaxy S7 Edge, and my USB cable it's damaged and I don't have a new one, do you have a good solution for this? baercuir7410 This e35b68d2b0e We are a real dating app, not a free anagramming app. Dec 15, 2019 Q. Hello, I have been using PhoneGap to make a simple application on my website. I use some of the jQueryMobile functionality to build the UI. Recently, I upgraded to jQuery 2.3.0 and jQuery Mobile 1.4.5. I have been experiencing some issues. Specifically, when I try to add an iframe tag to a jQueryMobile page I get this error: "Refused to execute script from " because its MIME type ('application/octet-stream') is not executable, and strict MIME type checking is enabled." I have verified the file extension on the file is correctly set to .js. What could be causing this and how can I resolve the issue? gbnf6eb4qg2lx93e krpxccf5fgrw1b3 It makes me sad that we cant change the way the world works. imsovery
